

PROJECT UPDATE

RSIC® Products Installed in Holiday Inn - Spectrum.

The Holiday Inn – Spectrum project incorporated the RSIC Family of products in one of the newest Holiday Inn projects in Lake Forest California, just south of the I-5, I-405 interchange. This new hotel backs up to I-5 where it is 16 lanes wide. The developer fully understood the challenge when selecting the location. Creating a new hotel in such close proximity to an enormous noise source.

Using the RSIC Family of products the owner has experienced exceptionally low number of noise complaints. The Hospitality Industry knows location is one key to getting a client to stay the first time. Excellent service combined with superior noise control brings the clients back. Today noise complaints reported on line are one of the biggest deliniators between success and failure in the hotel business. So

the owner took personal interest the design and installation of the noise control measures. The results are outstandingly quiet guest rooms and extra-ordinary level of repeat business....

“The RSIC® Recycled Content products support the company’s philosophy of being socially responsible,” says Elzo Gernhart, Vice President of PAC International, Inc. “Resilient Sound Isolation Clips are manufactured to be sustainable and environmentally friendly.”

Use of RSIC® products in building projects delivers the lowest installed cost of any high performance noise control solution. RSIC® isolation clips reduce total costs and materials used when integrated with alternative building methods, as well as exceed ratings for fire and sound. The new RSIC® Recycled Content

products contribute to obtaining a Leadership in Energy and Environmental Design (LEED) rating for a *green building* as created by the U.S. Green Building Council.

PAC International, Inc., is the world leader in *Noise Control Solutions* and is dedicated to delivering innovative engineering solutions, systems and assemblies using RSIC[®] products that result in benefits to developers, builders, design professionals and the environment. RSIC[®] products are UL Classified and exceed fire rating performance requirements. The RSIC[®] family of *Noise Control Solutions* consistently achieves superior Sound Transmission Class (STC) and Impact Insulation Class (IIC) ratings in both new construction and renovations while remaining cost effective and environmentally friendly.

Quiet and Fire Safe. A Combination for Life.
