RSIC-1 Sustainable Design Leads Qualifiers

Materials & Resources

During both the construction and operations phases, buildings generate a lot of waste and use a lot of materials and resources. This credit category encourages the selection of sustainably grown, harvested, produced and transported products and materials. It promotes the reduction of waste as well as reuse and recycling, and it takes into account the reduction of waste at a product's source.

Credit 4: Recycled Materials 1-2 pts

The RSIC products are constructed with over 50% recycled rubber adding to recycled content credits.

Credit 5: Regional Materials 1-2 pts

RSIC clips manufactured in Las Vegas Nevada

Innovation in Design

The Innovation in Design credit category provides bonus points for projects that use new and innovative technologies and strategies to improve a building's performance well beyond what is required by other LEED credits or in green building considerations that are not specifically addressed elsewhere in LEED. This credit category also rewards projects for including a LEED Accredited Professional on the team to ensure a holistic, integrated approach to the design and construction phase.

Credit 1: Innovation in Design 1-5 pts
