Dear Kim,

Re: STC and FSTC

Further to the request from Peter Ryan we confirm that from our experience, the field sound transmission class (FSTC) is between 3 and 5 less than the laboratory sound transmission class STC. This is provided that the partition has been constructed with good workmanship and that flanking is not a major factor in the FSTC.

Please let us know if you require any additional information

Yours sincerely,

Rodney Stevens 12.09.01
